

## Workshop Technician

An exciting opportunity has arisen for a Workshop Technician to join a cutting-edge power company based in Norfolk.

We provide the complete solution. Not only a leader in ultra-high performance electric motors but also complete EV drivetrains and ultra-fast power electronic systems.

As well as developing proprietary technology – such as an ultra-compact, lightweight high performance spoke motor – we also offer industry-leading EV consultancy too.

### **Key Responsibilities:**

- Operate drill press, grinders, lathe, or other machines to modify parts tested or to fabricate experimental parts for testing
- Carrying out measurement and inspection techniques using metrology equipment.
- Discuss changes in design, method of assembly, and drafting techniques and procedures with Engineers
- Assembling / Disassembling of products
- Change over equipment on the test rigs
- Reading engineering drawings
- Fault finding
- Travel offsite to clients or suppliers.

### **The right Candidate will be: -**

- Organised and highly motivated
- Be able to work well under pressure.
- Have experience with a strong working knowledge of tools
- Able to work to a high level of accuracy with attention to detail.
- MS office knowledge
- Be able to self-manage with minimal supervision, obtaining guidance when required.

### **Desirable**

- CNC experience – Milling / Turning
- Forklift Licence
- IMI accreditation
- First aid trained
