

CNC Miller – Programmer/Setter/Operator

An exciting opportunity has arisen for a CNC Miller to join a cutting-edge power company based in Norfolk.

We provide the complete solution. Not only a leader in ultra-high performance electric motors but also complete EV drivetrains and ultra-fast power electronic systems.

As well as developing proprietary technology – such as an ultra-compact, lightweight high performance spoke motor – we also offer industry-leading EV consultancy too.

Key Responsibilities:

- Machine all works orders to specification
- Complete all work orders to a schedule
- Produce one off R&D components
- Discuss with Engineers/Designers on components and manufacturing capabilities
- Reporting to Workshop Manager on tasks/progress/issues/requirements
- Machine and general workshop housekeeping
- General maintenance of Machines
- Operate drill press, grinders, lathe, or other machines to modify
- Carrying out measurement and inspection techniques using metrology equipment.
- Reading engineering drawings

The right Candidate will be: -

- Organised and highly motivated
- Be able to work well under pressure.
- Experienced with conversational programming – (Mazak Mazatrol smooth G beneficial)
- Working with own initiative and with a team
- Able to work to tight tolerances and maintain tight tolerances
- Able to read engineering drawings
- Good at time keeping with works orders
- Ability to improve runtimes on batch work

Desirable

- Mazak Mazatrol smooth G experience
- CAD/CAM experience
- Tooling knowledge – feeds/speeds/suppliers
- Knowledge of metrology

Reports to Workshop Manager
